

TASKI Sani 4 in 1 SmartDose

Washroom cleaner, descaler, disinfectant and deodoriser – concentrate

Key properties:

- ▶ Acid based formulation
- ▶ Cleans, descales, disinfects and deodorises in one step
- ▶ Effective against a wide spectrum of micro-organisms
- ▶ Unique, patented ONT air neutralising technology alters malodour molecules
- ▶ SmartDose system allows simple, accurate, safe dosage of super concentrated chemicals

Product description

Sani 4 in 1 is a concentrated cleaner, descaler, disinfectant and deodorizer for all acid and water resistant hard surfaces in washroom areas. Its special formulation combines excellent cleaning performance while preventing scale build-up, even in hard water conditions. Fungicidal, yeasticidal and bactericidal. Thanks to its smart packaging, the SmartDose concept allows easy, safe and accurate dosing of concentrated cleaning products. SmartDose is the solution of choice when combining performance, safety for the user and environmental responsibility. SmartDose is used at low dosages, limiting the use and disposal of chemicals into the environment and is packed in recyclable material.

Benefits

- ▶ Excellent cleaner: works in a large spectrum of water hardness conditions
- ▶ Reduces the number of products required for the washroom
- ▶ Excellent disinfection properties: fungicidal, yeasticidal and bactericidal
- ▶ Neutralises malodour molecules and therefore enhances the image of your washroom
- ▶ Convenient and controlled dosing through the SmartDose system
- ▶ The solution is non-classified at in use dilution

Application

TASKI Sani 4 in 1 SmartDose

Use instructions

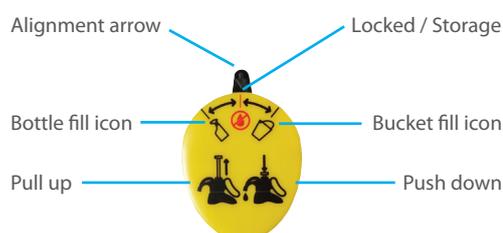

Dosage - Accurate dosage saves costs and minimises environmental impacts. The SmartDose dosing system can be used for controlled dosing into spray bottles or manual cleaning buckets.

▶ For a full bactericidal, fungicidal and yeasticidal activity, dilute product at 2.5 % ▶ For a bactericidal activity according to EN1276, dilute product at 1%

Important - Do not mix with other products. Do not use on water- or acid sensitive surfaces. Sufficiently pre-wet grouts with water.

Application - Bucket cleaning and disinfection of floors:

1. Fill the bucket with 5L of water
2. Turn the yellow head to bucket position; pull head up fully; then push down fully to release product into the bucket.

Application - Spray cleaning and disinfection of surfaces:

1. Fill the spray bottle with 500ml water
2. Turn yellow head to bottle position; pull head up fully; then push down fully to release product into the bottle. PICTURE OF YELLOW SMARTPUMP
3. Spray onto cloth or directly onto surface and wipe the surface
4. Allow to act as necessary
5. Rinse surface and allow to dry

Technical Data

Description		Description	
Appearance:	clear, red coloured liquid	pH-value neat:	0.5 – 1.0
Relative density (20oC):	1.044	pH-value in use:	1.8 +/- 0.5 at 2.5 %

The above data is typical of normal production and should not be taken as a specification.

TASKI Sani 4 in 1 SD

Description	Pack size	SKU Number
TASKI Sani 4 in 1 SD	1 x 1.4L SmartDose bottle	7518860
Screen printed spray bottle with foaming trigger		7518580
Dosing bottle with foaming head for excellent performance and safety		7519442

Safety information

Safe handling: Full guidance on the handling and disposal of this product is provided in a separate Material Safety Data Sheet. Only for professional users / specialists

Storage information: Store in original closed containers away from extremes of temperature.

Environmental information: The surfactants used in this product are ultimately biodegradable in compliance with the requirement of the EU Detergent Regulation, EC 648/2004.

Microbiological data: TASKI Sani 4 in 1 SD is bactericidal according to EN1276 at 1% and EN13697 at 2 %, 5 minutes contact time, 20°C under dirty conditions and in water of standardised hardness.

TASKI Sani 4 in 1 SD is yeasticidal (Candida) according to EN13697 at 1.5%, 15 minutes contact time, 20°C under dirty conditions and in water of standardised hardness.

TASKI Sani 4 in 1 SD is fungicidal (Aspergillus Niger) according to EN1650 and EN13697 at 2.5%, 15 minutes contact time, 20°C under dirty conditions and in water of standardised hardness.

Proven efficacy against following viruses: Expert opinion and test report to prove efficacy against influenza A virus H3N8 (avian)
Expert opinion and test report to prove efficacy against influenza A virus H1N1 (swine)
Test report to prove efficacy against human rotavirus strain Wa
