

# Your Concentrated Business Solutions

**TASKI®** by Diversey

## Innovative portable dosing platform for building care cleaning solutions with EU flower certified concentrates

Looking for a simpler, safer and smarter dosing system for your daily cleaning activities? SmartDose™ will be the unique answer for your needs.

SmartDose™ is an innovative 1.4L dosing bottle without the need for water connection setting a new industry benchmark of accuracy and control for users and requires minimal training.

With SmartDose™ all your sites will have access to unique convenient dosing solution using only 3 products with EU flower certified concentrates.

## Flexible and Portable – no water connection

SmartDose™ bottles do not require any connection to water and can therefore be used in any of your sites. Also ideal for your very small sites with low consumption which cannot be supplied on a regular basis.

## Improves your Environmental Footprint

The SmartDose™ bottle is a closed dosing system, which provides maximum level of consumption control. All daily cleaners are concentrates as well as EU flower certified and the bottle is 100% recyclable ensuring a minimal impact on the environment.

## Simplifies your Operation

Due to the Smartpump technology measuring is not needed anymore. All user instructions are icon based, which minimises the training. With only three products you can clean the whole building in any method of your choice.

## Benefits of using Concentrates and Dosing control

- Concentrated chemistry improves your environmental footprint. It dramatically reduces product waste and transport as well as the amount of plastic you need to dispose.
- Concentrated chemistry allows smaller pack to be used less frequently which positively impacts your logistics costs by reducing the transport and storage costs while delivering in parallel excellent cost in use.
- With concentrates, the dosing aid is integrated in the chemical bottles and provide a more practical, safe, accurate and easy to use system for your staff.
